

Land Rover Defender 501 Concept

The most widely recognized vehicle in the Land Rover stable, the Defender has long been the choice of those who seek to explore. Over forest, desert, sea and stone, the Defender has covered the globe, and has built a reputation for unparalleled capability.

Currently shipped around the world in CKD, or "complete knock-down" form, the Land Rover Defender undergoes final assembly in one of five manufacturing facilities, where a host of body styles, accessories, and equipment options are made available to customers. The product of the São Bernardo do Campo facility in Brazil, the Land Rover Defender 501 Concept shares the spirit of the limited-edition NAS Defender 110, which was reintroduced in 1993 to the North American market.
